

CUSTOM CONTAINER ORDERS

Murray's is now offering a service to design and plant custom containers or baskets. Using either your own container, or one of the many that we sell onsite, Murray's can create a beautiful arrangement that meets your style and taste.

If you are interested in this service, please drop by the Garden Centre with your container, and we will discuss the design of the container, as well as provide you with an estimate.

Below are some photos of past containers and baskets.

*Note: It is required that containers be picked up before June 25. We remind customers to order early, as those planted later in the season have less time to mature, and will not look as full as those planted in April and May.
