We maintain gardens professionally.

The design and installation of a garden takes a lot of inspiration, work and investment. A new garden is an absolute joy, but every garden is only as good as the maintenance which follows.

We provide garden maintenance services that are customizable to work for you. The frequency of our visits depend on your needs and requirements. We can visit once or twice a month to carry out all the tasks to keep your garden growing and healthy. Or, we can stop by for a one-time visit if you only need tips on the timing and best practices for certain maintenance techniques. Our visits can focus on tasks such as a Spring clean-up, mid-season fertilizing and pruning, or a Fall clean-up and winterizing visit.

We can also help plan your garden throughout the changing seasons, by assisting with annual or perennial planting, container gardens, vegetable bed lay-out, and beautiful Fall bulb planting.

A garden consultation is the key to receiving practical advice about your garden. Every inquiry is welcome - we love to talk gardening! Contact us to today to book your consultation.
